

SMARTOSCOPE

DIGISCOPING SOLUTIONS, MADE IN AUSTRIA

Digiscoping

the smart way.

The Gyrfalcon (Falco rusticolus) is the largest of the falcon species, this majestic bird of prey, unlike other falcons circles high in the sky as it searches for prey. It breeds on Arctic coasts and tundra, and the islands of northern North America and the Eurosiberian region.

SMARTOSCOPE VARIO II

Universal digiscoping adapter for smartphones.

Attaching your smartphone to a spotting scope or binocular to record close up detailed images of the natural world can be one of the most engaging and enjoyable experiences for any outdoor enthusiast, creating lasting memories and capturing incredible moments.

The SMARTOSCOPE VARIO II is designed to enhance this experience to a new level by delivering a truly universal smartphone digiscoping solution that is engineered for maximum convenience and ease of use.

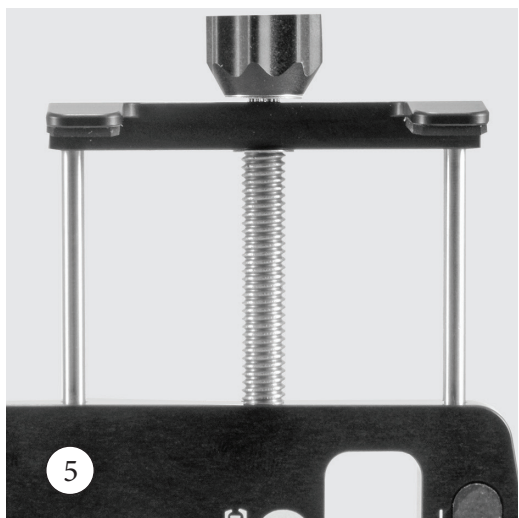

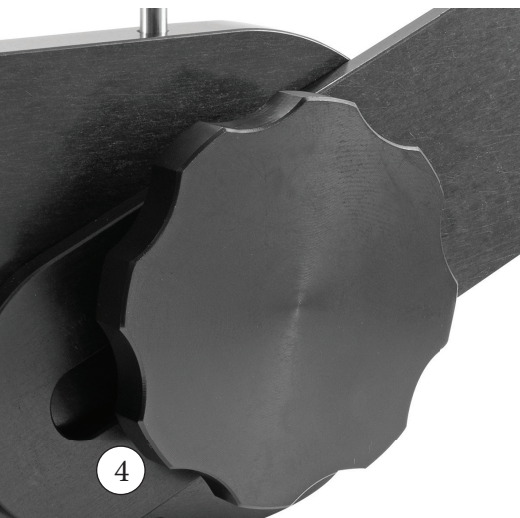

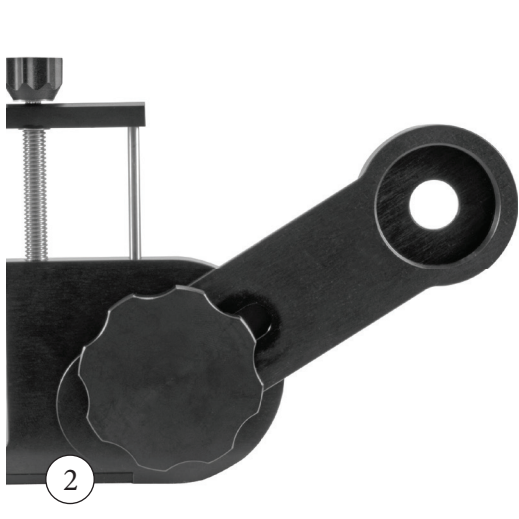

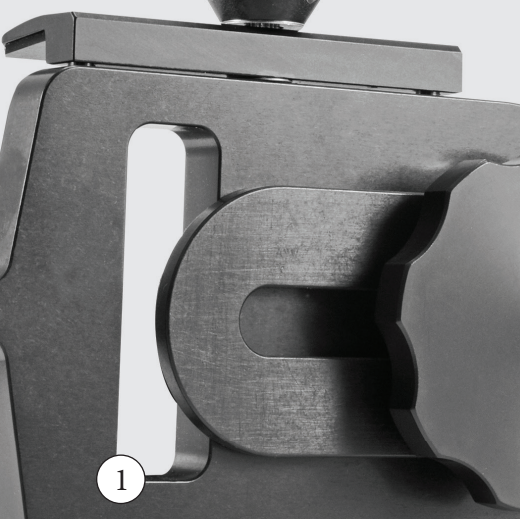

The design team behind the SMARTOSCOPE VARIO II are pioneers in the world of smartphone digiscoping and have poured every ounce of their experience out in the field to produce an adapter that truly elevates the smartphone digiscoping experience.

The SMARTOSCOPE VARIO II can accommodate most smartphone phone models of any brand, large or small in size with single or multiple camera lenses to give you full creative control over your digiscoped images and video.

Every component is highly engineered, utilizing premium materials for unparalleled levels of fine tune adjustment and secure, stable connection.

This is how smartphone digiscoping should be.

DESIGNED BY DIGISCOPERS FOR DIGISCOPERS

Truly universal.

- ① A body crafted from, lightweight and strong high grade polyoxymethylene "POM-C".
- ② A smooth opticsrail aligns your chosen smartphone camera lens perfectly with the eyepiece of the spotting scope.
- ③ The opticsrail features a screw thread to allow connection of smartphone adapter rings to connect the unit to an eyepiece.
- ④ A finely engineered locking wheel instantly secures the opticsrail in the position you set without play or movement.
- ⑤ The phone clamp adjusts to accommodate even very large smartphone models.
- ⑥ The clamp adjustment thread secures the smart phone.
- ⑦ The phone clamp and base are angled to help secure the smartphone and prevent slipping.
- ⑧ Protection rubber is utilised at key points to eliminate friction between the smartphone and the adapter plate ensuring a stable, scratch free fitting.
- ⑨ The main plate has 2 recessed rubber strips that serve both as anti-slip protection and as a support surface that is gentle on the housing.

Truly usable.

SMOOTH PRECISION. EFFORTLESS ALIGNMENT.

The SMARTOSCOPE VARIO II is designed for frustration free digiscoping, and its opticsrail operation is a perfect example of that thoughtful engineering.

A specially integrated rubber connection plate between the opticsrail and the main adapter body creates an exceptionally smooth and stable interface, allowing the rail to glide effortlessly during adjustment.

This rubberized contact point not only improves stability, but also makes precise alignment quick and intuitive.

The opticsrail can be positioned seamlessly with the smartphone camera, helping to achieve the perfect setup in seconds, no shaking, slipping, or awkward resistance.

When it's time to lock everything in place, the screw lock benefits from the same secure rubber support.

The result is a firm, play-free hold that keeps the optics rail strong and steady, ensuring a reliable connection every time.

*With smooth motion, solid locking,
and precision control, the
SMARTOSCOPE VARIO II
delivers a truly premium
digiscoping experience.*

INSERT

ALIGN

CONNECT

ATTACH

SIMPLICITY IS THE KEY

So convenient, you might have to remind yourself it's universal.

Out in the field is when you truly appreciate the research and development that went in to producing the SMARTOSCOPE VARIO II

Seconds count - it can mean the difference between capturing that once in a lifetime image or not, that's why every design feature has been considered with the goal of producing a universal smartphone digiscoping adapter that is quick to set up, adjust and use.

The engineering delivers smooth, fine adjustments for perfect camera lens alignment every time and once you lock the opticsrail it stays locked, no play, no movement, no frustration.

Simply **INSERT** your smartphone in to the adapter and clamp it into place, adjust the opticsrail to **ALIGN** with your camera lens and secure. **CONNECT** a smartphone adapter ring and **ATTACH** the assembly on to your scope eyepiece.

The phone sits securely in the adapter with no risk of slipping or falling. Lens alignment remains in place all day. Job done.

*In the past, a universal adapter has meant compromise.
Not any more.*

Each kit comprises of:

- SMARTOSCOPE VARIO II smartphone adapter.
- Push on eyepiece ring.
- Lanyard.

READY MADE KITS

The ultimate smartphone set-up for premium spotting scopes.

SMARTOSCOPE VARIO II ready-made kits deliver the ultimate in ease and compatibility for smartphone digiscopers. Each kit includes a precisely matched eyepiece ring designed for a wide range of premium spotting scope manufacturers, including Kowa, Swarovski, Zeiss and Leica .

With a perfectly engineered push-on fit, the included adapter ring attaches securely to the scope eyepiece in seconds, providing a stable, perfectly aligned connection for fast, effortless smartphone digiscoping.

KOWA SPOTTING SCOPES

SMARTOSCOPE VARIO II Kit for KOWA TSN-55/66/770/880/88/99 PROMINAR
SMARTOSCOPE VARIO II Kit for KOWA TSN-550/60/66/82SV

SWAROVSKI SPOTTING SCOPES

SMARTOSCOPE VARIO II Kit for SWAROVSKI ATC/STC-ATX /STX
SMARTOSCOPE VARIO II Kit for SWAROVSKI ATS/STS

ZEISS SPOTTING SCOPES

SMARTOSCOPE VARIO II Kit ZEISS VICTOR.DIASCOPE (15-45x65/20-60x85)
SMARTOSCOPE VARIO II Kit ZEISS VICTOR.DIASCOPE (15-56x65/20-75x85)
SMARTOSCOPE VARIO II Kit for ZEISS GAVIA 30-60x85
SMARTOSCOPE VARIO II Kit for ZEISS HARPIA 22-65x85 / 23-70x95

LEICA SPOTTING SCOPES

SMARTOSCOPE VARIO II Kit for LEICA APO-Televid 25-50x65 / 25-50x82
